Although graduate students may have studied communication in their undergraduate programs, their advanced courses may introduce types of reports, such as literature reviews or presentations of published articles that are uncommon in undergraduate courses. The materials listed below offer brief but salient advice on how to succeed with such assignments.

- Advanced Biomechanics Teaching Project(Bioengineering)
- Communicating Ethically
- Copyright and Electronic Publishing: Citation
- Demonstrating Your Knowledge and Contributions to a Profession[1]
- How to Read a Scientific Article[2]
- How to Read a Scientific Article with Civil Engineering Example (Civil Engineering)[3]
- Presenting a Technology Analysis (Computer Science)[4]
- Questions That Matter in an Internship Report[5]
- Recognizing and Avoiding Plagiarism[6]
- Sample Executive Summary for an Internship Report to Managers[7]
- Seven Ways to Motivate the Audience[8]
- Template for Taking Notes on Research Articles: Easy access for later use [9]

You may also wish to consult more general resources on communication:

- Group or Team Communication Resources[10]
- Speaking and Oral Presentations Resources[11]
