Abstract

This work attempts to describe the nature of the evolution of the non-spatial (material) universe, the universe as seen through the semi-idealistic framework of the NSTP (Non – Spatial Thinking Process) theory. As per the NSTP theory, the existence of the superhuman mind (i.e. NSTPs) is responsible for the orderly existence of the non-superhuman mind/s (i.e. NSTP/s). These superhuman NSTPs, representing the empirical laws/design of the (non-spatial) material universe, could be called as the design (superhuman) NSTPs. This design came into existence due to some designer (superhuman) mind (i.e. NSTP), which no longer exists. Further, there should be some other design (superhuman) NSTPs responsible for the orderly existence of the designer (superhuman) NSTP, and so on. Such is supposed to be the nature of the evolution of the non-spatial (material) universe.
