## 7 Memorandum

When might water be dangerous?

Discuss the dangers that are evident in the picture after the learners have completed the assignment.

Table 1

- When babies and toddlers bath in very hot water
- When babies and toddlers are left in the bath without supervision.
- Swimming pool dangers.

Connexions module: m19938 6

- A river may be too shallow for diving without you knowing it, and may contain germs.
- The water in a dam may be too shallow and contaminated (stagnant water).
- There may be sharks in the sea, or currents that can lead to drowning.
- Any spontaneous response form the class.
- 1. For cooking food, for cleaning and drinking
  - A pot of food the stove
