Abstract

This module serves as the Preface to a collection titled Object-Oriented Programming (OOP) with
Java.

1 Welcome

Welcome to my collection titled *Object-Oriented Programming (OOP) with Java* .

During the past eighteen years, I have published hundreds of Java and OOP programming tutorials on
a variety of different topics and websites. I have also developed the teaching materials for several different
college-level programming courses in Java/OOP.

A work in progress

This is a work in progress. I am currently selecting content from those earlier endeavors and integrating
that content into a freely downloadable E-book that covers Java/OOP programming from programming
fundamentals to very advanced OOP concepts.

Among other things, the collection contains the material that I use to teach the following two courses at
Austin Community College in Austin Texas:

- ITSE 2321 - Object-Oriented Programming (Java) [1]
- ITSE2317 - Java Programming (Intermediate) [2]

The collection also includes:

- An OOP self-assessment test [3]
- Course materials for a complete course in Programming Fundamentals [4]

Because it is a work in progress, the collection is growing on a daily basis. If you don't find what you need
today, come back and take another look in a week or two and you may find what you need then.

Download options

I encourage you to take advantage of all of the download options *(most of which are free)* that cnx.org
[5] has to offer. You can also customize this material for use in your organized courses or for personal self
study.

Feedback is appreciated

And if you find the material useful, I would like to hear more about how you are using it.

2 Miscellaneous

This section contains a variety of miscellaneous information.

NOTE: **Housekeeping material**

- Module name: Jy0010: Preface to Object-Oriented Programming (OOP) with Java
- File: Jy0010.htm
- Published: November 16, 2012
- Revised: November 29, 2012

NOTE: **Disclaimers: Financial** : Although the Connexions site makes it possible for you to download a PDF file for this module at no charge, and also makes it possible for you to purchase a pre-printed version of the PDF file, you should be aware that some of the HTML elements in this module may not translate well into PDF.

I also want you to know that I receive no financial compensation from the Connexions website even if you purchase the PDF version of the module.

In the past, unknown individuals have copied my modules from cnx.org, converted them to Kindle books, and placed them for sale on Amazon.com showing me as the author. I neither receive compensation for those sales nor do I know who does receive compensation. If you purchase such a book, please be aware that it is a copy of a module that is freely available on cnx.org and that it was made and published without my prior knowledge.

Affiliation : I am a professor of Computer Information Technology at Austin Community College in Austin, TX.
