Abstract

This module serves as the Preface to group of modules titled OOP Self-Assessment

1 Welcome

Welcome to my group of modules titled *OOP Self-Assessment* .

This is a self-assessment test designed to help you determine how much you know about object-oriented programming (*OOP*) using Java.

In addition to being a self-assessment test, it is also a major learning tool. Each module consists of about ten to twenty questions with answers and explanations on two or three specific topics. In many cases, the explanations are extensive. You may find those explanations to be very educational in your journey towards understanding OOP using Java.

To give you some idea of the scope of this self-assessment test, when you can successfully answer most of the questions in the first fifteen modules, your level of knowledge will be roughly equivalent to that of a student who has successfully completed an AP Computer Science course in a U.S. high school. This is based on my interpretation of the College Board's Computer Science A Course Description ¹ .

2 Miscellaneous

This section contains a variety of miscellaneous information.

NOTE: **Disclaimers: Financial** : Although the Connexions site makes it possible for you to download a PDF file for this module at no charge, and also makes it possible for you to purchase a pre-printed version of the PDF file, you should be aware that some of the HTML elements in this module may not translate well into PDF.

I also want you to know that I receive no financial compensation from the Connexions website even if you purchase the PDF version of the module.

In the past, unknown individuals have copied my modules from cnx.org, converted them to Kindle books, and placed them for sale on Amazon.com showing me as the author. I neither receive compensation for those sales nor do I know who does receive compensation. If you purchase such a book, please be aware that it is a copy of a module that is freely available on cnx.org and that it was made and published without my prior knowledge.

Affiliation : I am a professor of Computer Information Technology at Austin Community College in Austin, TX.
